

We're looking for

Software developer intern

At Epiito we develop virtual reality software solutions for healthcare, architects and the construction industry. Our goal is to become the market leader in software for 1:1 scale prototyping.

We are looking for 3 interns with flair for software development. You get to work in a tech company where you get responsibility and get your fingers all the way down the machinery. So if you're want to test your theory in practice in software development - you have the chance now!

About Epiito

You get to work with a mix of developers, salesmen and graphic designers. Our headquarters located in Copenhagen and our development department is located in Aarhus. You will work in Aarhus in a team of around 10 other colleagues.

You are

- Ambitious and structured
- Not afraid to ask questions
- Studying Computer Science
- Experienced in C# and preferably within Unity3D
(Not a requirement)
- Proactive and happy to propose initiatives

Typical tasks

- Developing new features
- Maintenance of existing systems
- Testing and documentation of your work
